Physician Endorsed Capri

PHYSICIAN ENDORSED

The founders of Colorado-based Physician Endorsed, Michael Ross and Elissa Margulies, know that it isn't just the rugged outdoorsy types who need to cover their noggins. Since 2002, the fashion- and health-conscious husband-and-wife team has been producing an eye-catching line of women's hats that not only provides stylish protection but also gets the nod from a full-fledged medical advisory board. All of their products have the highest UPF ratings, and each is sold with a packet of dermatologist-tested sunscreen/moisturizer.

Features Capri: Lightweight, 100 percent cotton denim; UPF 50+; packable/crushable; hand-washable; brim fringe imparts "innocent chic" look.

Malibu: Reversible "Missoni" print straw/canvas; UPF 50+; wide brim extends to partially cover the shoulders; packable/crushable; hand-washable.

Tester's Notes Capri: Simple, extremely comfortable, well-made hat that looks as

good with a swimsuit as with a casual touring outfit; stays put even when hit with a fairly steady

breeze; about \$45; one size; white, navy, black, brown, olive and khaki. **Malibu:** Feels comfortable worn on either side; great for a party, a beach picnic, or a walk in the park; about \$60; one size; multi/gold or multi/olive; www.physicianendorsed.com.
